- **Nature Detectives**  
  K - 3  
  Come on a sensory journey through the forest. Feed the trees, explore with magnifiers, meet a bug or two and learn how life in the forest is connected.

- **Beautiful Bats**  
  K - 3  
  Discover the many wonders of the only mammal to achieve flight. Fly like a bat and learn how scientists study them.

- **Beach Explorers**  
  K - 7  
  Explore the diverse world of the intertidal zone at low tide. Search for crabs and sea stars, sort seaweeds, spot shorebirds, and build a crabitat. 
  Delivered in spring only

- **Seasons and Cycles**  
  K - 3  
  Discover the many ways that nature moves in cycles by diving into the water cycle, exploring seasonal shifts and changes and getting a close look at the metamorphic life cycles of animals.

- **Wetland Wildlife**  
  3 - 7  
  Wetlands are increasingly rare but vital for many plants and animals. Using binoculars, nets and magnifiers, discover the inhabitants of Beaver Lake and how this ecosystem changes.

- **Introduced Invaders**  
  4 - 12  
  How do invasive species impact ecosystems? Help protect Stanley Park's biodiversity as you replace invasive ivy with native plants in this hands-on program.

- **Forest Fundamentals**  
  4 - 7  
  Engage all of your senses to piece together the story of forest dwelling plants and animals and their important roles in the web of life.

- **Indigenous Plant Use**  
  K - 12  
  Walk through the forest with an experienced guide of Coast Salish descent and learn about the traditional and present-day indigenous relationships with local flora and fauna. Available Tuesdays and Thursdays.

- **Stanley Park Survivor**  
  4 - 7  
  Learn the essentials of what humans need to survive. Try knot tying and practice your new skills while building your own wilderness survival shelter.

More Programs Available:
- In class programs for K - 3
- Additional high school programs available on request
- Overnight urban camping
- Teacher Workshops
- Self guided discovery walk
